

Spraytech supplies spray nozzles for liquid tar, binders and sealers, bitumen emulsion, and modified polymers for the asphalt paving industry. Nozzles by Copley are approved by Austroads and the [Australian Asphalt Pavement Association](#). The nozzles are available with various orifice sizes to give different rates of application, and specially- designed end nozzles are available.

Nozzles manufactured by Copley to meet this specification are marked A, B or S (EA, EB or ES for End Nozzles) plus two numbers for the capacity size.
